Bucket Versioning

☒ Disable
☐ Enable

Tags - optional (1)
You can use bucket tags to track storage costs and organize buckets. [Learn more](#)

Key: Value - optional:

Default encryption [info](#)
Server-side encryption is automatically applied to new objects stored in this bucket.

Object Ownership [info](#)
Control ownership of objects written to this bucket from other AWS accounts and the use of access control lists (ACLs). Object ownership determines who can specify access to objects.

☒ **ACLs disabled (recommended)**
All objects in this bucket are owned by this account. Access to this bucket and its objects is specified using only policies.

☐ **ACLs enabled**
Objects in this bucket can be owned by other AWS accounts. Access to this bucket and its objects can be specified using ACLs.

Object Ownership

The first screenshot shows the 'Upload' page in the AWS S3 console. It includes a drag-and-drop area, a 'Files and folders' table with one item 'selector.html' (826.0 B), and a 'Destination' section.

The second screenshot shows the 'rmgdotnetapp' bucket with one object 'selector.html' (html, 826.0 B, Standard storage class).

The third screenshot shows a 'Successfully deleted bucket "rmgdotnetapp"' message and an 'Amazon S3' promotional banner with a 'Create a bucket' button.

Files and folders (1 Total, 826.0 B)

Name	Folder	Type
selector.html	-	text/html

Destination

Objects (1)

Name	Type	Last modified	Size	Storage class
selector.html	html	January 18, 2024, 12:20:19 (UTC+05:30)	826.0 B	Standard

Amazon S3
Store and retrieve any amount of data from anywhere

Amazon S3 is an object storage service that offers industry-leading scalability, data availability, security, and performance.

Create a bucket

Every object in S3 is stored in a bucket. To upload files and folders to S3, you'll need to create a bucket where the objects will be stored.

Create bucket

Pricing

With S3, there are no minimum fees. You only pay for what you use. Prices are based on the
